# The Still living Jack Kennedy speaks out

Two years ago, I informed the NEMO of a number of key revelations: That I am still alive, (and had just turned one hundred). That my “assassination” was in truth, staged. That I had every reason to fake my own assassination (namely an influence peddling, prostitution ring scandal involving Bobby Baker, LBJ and yours’ truly. This could have broken the same day I was “buried”). It wasn’t Oswald, (who was a patsy, regrettably) or the Soviets, or the Cubans or the CIA or even the Mob. It was ultimately a plot that was carried out at my own direction: my staged assassination was a desperate, Machiavellian effort to preserve my legacy and protect Civil Rights legislation.

Since the above paragraph is merely a recap of past revelations, it may not be that interesting to you. But what I can tell you today challenges a number of other mainstream misconceptions that still pervade our understanding of 20th Century History. First, although the Moon-landings were not faked by the US Government, there is still a great deal concerning the moon landings which you haven't been told. By 1965, my brother Bobby reached me at my secret Jack cave in the Florida Keys. After his tearful discovery of my continued existence, he informed me that the NASA program was way off schedule. That NASA wouldn't be able to put a man on the moon until 1978.

If NASA wasn't able to put someone on the moon in 1969 (and they weren't) and if the US Government didn't fake the moon landings (and it didn't) than how in the name of all that is lunar and sacred did we see Neil Armstrong land on the moon? The answer my friends is not blowing in the wind, the answer is not blowing in the wind. The Soviets actually wanted to stroke our large egos by faking the moon landing. But why on Earth would they do this? Wouldn't that give us undeserved prestige in the Space Race? Well, it was partly that the Soviets wanted to make us feel better about the Kosmonauts who reached Space before us. More crucially, they wanted to trick us into spending more money on an ineffective space program, and this was way the Soviets faked the moon landings, and we broadcast the footage because it advanced American prestige.

More revelations to come in the next NEMO.
